

$$\text{area}(U) = \text{area}(\gamma_-) = \text{area}(\gamma_+)$$

(a) side by side. U is one of the two disks, of area 8.

$$\text{area}(U) = \text{area}(\gamma_-) - \text{area}(\gamma_+)$$

(b) nested. U is the crescent, and its area is the *difference*; both curves at 8 leave it empty.
